Blinds Between the Glass

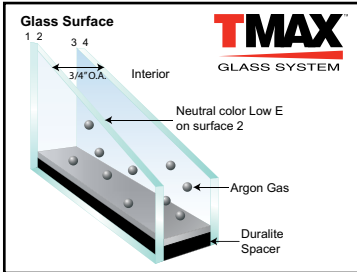

The unique Blinds Between the Glass option offers a quality solution for patio door treatments. Engineered for ease of use, the internal design makes raising and lowering the blinds a snap. The blinds are sealed between the glass offering longer life and eliminating the need for dusting.

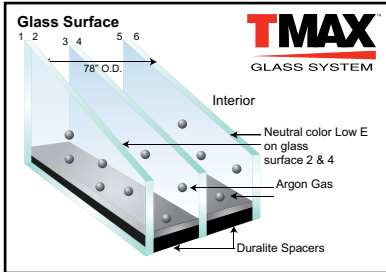

Customize your 1600 Series windows with decorative and efficient **OPTIONS.**

Glass Options

TMAX™ insulated glass packages are offered as an upgrade to help you save heating and cooling costs while keeping your home more comfortable. In warm weather, TMAX reduces solar heat gain, minimizing interior glare and lowers interior glass temperature, saving energy and making your home more comfortable. In cool weather, TMAX provides outstanding thermal performance with warmer interior glass surfaces to help save energy and maintain comfort during a cold winter.

Meets ENERGY STAR® requirements in North, North-Central, and South Central Zones.

Meets ENERGY STAR® requirements in all Zones.
